

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

a course of instruction at the Naval Medical School. During this course he receives full pay and allowances of his rank, and at the end of the course he takes a final examination. Two of these courses begin each year, one commencing about the first of October, and the second course beginning early in February. The examinations are held in several of the coast cities in the United States, both on the east coast and the west coast, and also at Chicago, Ill. Literature describing the navy as a special field for medical work, and circulars of information for persons desiring to enter the medical corps, may be obtained by addressing the Surgeon General, U. S. Navy, Navy Department, Washington, D. C.

UNIVERSITY AND EDUCATIONAL NEWS

By the will of Mrs. Mary W. Harkness, widow of Charles W. Harkness, about \$1,100,000 is bequeathed to public purposes. The largest bequest is \$300,000 to Yale University, the income to be used in the payment of salaries of officers of instruction.

BOSTON UNIVERSITY has received an anonymous gift of \$100,000 for scholarships for young men in the college. The gift is made in honor of Augustus Howe Buck, emeritus professor of Greek.

PROFESSOR AND MRS. WILLIAM A. HERDMAN, of the University of Liverpool, have given to the university the sum of £10,000 for the endowment of a chair in geology in memory of their son, who was killed in the war.

PAUL SABINE, of Harvard University, has been appointed assistant professor of physics at the Case School of Applied Science and will have charge of the physics laboratory.

DR. A. R. DAVIS, formerly research assistant at the graduate laboratory, Missouri Botanical Garden (Shaw School of Botany, Washington University), has been appointed assistant professor of botany at the University of Nebraska. Mr. R. A. Studhalter and Mr. H. C. Young, formerly Rufus J. Lackland research fellows in the same institution, have been appointed, respectively, assistant botanist in the Mon-

tana Agricultural Experiment Station and instructor in botany in the Michigan Agricultural College. Miss Ruth Beattie has accepted a position as instructor in botany at Wellesley College.

At the University of Sheffield Dr. W. E. S. Turner has been appointed lecturer in charge of the new department of glass technology.

DISCUSSION AND CORRESPONDENCE PSYCHOLOGY AND MEDICAL EDUCATION

TO THE EDITOR OF SCIENCE: In your issue of November 10, Dr. Cecil K. Drinker has approached the problem of advising students planning to enter the medical profession as to what courses over and above those required they can most profitably give their attention to during their college years. Dr. Drinker has urged the undergraduate to take as much physics and chemistry as possible: I should like to enter a similar plea in favor of psychology.

The importance of a knowledge of psychology to all persons engaged in the practise of medicine is, no doubt, widely recognized by both practitioners and teachers of that science and art to-day, and the value of psychological study as a part of medical education received special attention in a symposium and report on the subject in SCIENCE for October 17, 1913. Little has been heard of the matter recently, however, and I feel it can do no harm to bring up the subject again in the hope that real interest may be aroused in pushing it more effectively to the front.

The conclusions of the report referred to clearly enunciate the need of more cooperation than is at present existent between psychologists and—not only psychiatrists, whose concern is primarily with the problems of the diseased mind—but also the physicians of the body. For all schools of psychology to-day acknowledge and even emphasize the inseparableness of mental states and processes from the physiological conditions which underlie or at least invariably accompany them, and medical men are fully aware of the influence which mental states have upon the health of the body.
